## LIGATURF TRION R

FOOTBALL, MULTISPORT

The LigaTurf Trion R creates optimal conditions for ball sports at the highest level. Thanks to its density, wear-resistance and soft, flexible surface, the unfilled synthetic turf can withstand even the highest playing speeds and demanding manoeuvres throughout its long lifecycle. What's more, the filaments are made largely of recycled material, making the LigaTurf Trion R a sustainable investment in the future of sport.

A mixture of smooth and textured filaments (RS+ R, LigaGrass Pro R and LigaGrass Synergy) gives the LigaTurf Trion R ideal ball-rolling characteristics and retaining force. New Polytan X-Tuft technology brings enhanced grip, stability and compactness to the turf, thanks to double offset stitching. This also provides increased traction and safety, even when performing challenging manoeuvres.

Three different shades of green give the LigaTurf Trion R a natural look and make it a real eye-catcher. Easy care rounds off the user experience.

### PROPERTIES

- TriColour design
- Unfilled turf system (also available as sand-filled version)
- Green Technology Inside: Filaments made from recycled raw materials
- 100 % PolyCoat wear coat with Tuft Guard function
- Exclusive Polytan 100 % PE formulation
- Exclusive Polytan PreciTex texturing
- Exclusive Polytan X-Tuft technology

We act sustainably – from the development and selection of our raw materials, to the production, installation, maintenance and recycling of our sports surfaces. Our products are designed with durability and efficient manufacturing in mind, using ecological materials and reliable processes.
