REKORTAN PUR / PUR INDOOR

ATHLETICS

Rekortan PUR is the ideal surface for breaking records and top-level international sport. Its special solid construction enables optimal acceleration and performance.

As a solid synthetic surface, Rekortan PUR is used for competitions in athletics stadiums with running tracks and run-up tracks. Thanks to interspersed EPDM granules in the wear layer, the surface is highly abrasion resistant, exceptionally well-suited to running shoes with spikes, and has a long lifespan. Energy-boosting tread elasticity and superior acceleration round off the features of this top-quality surface. Rekortan PUR Indoor is designed for indoor sports at the same top level as our outdoor surfaces. With a structure of 100% high-quality EPDM granules in all three individual layers, the indoor surface fulfils the global requirements for indoor applications, including those of World Athletics.

PROPERTIES

- Surface poured in-situ, multilayer
- Impermeable
- Granules interspersed with visible tips, extremely spike-compatible
- Certified in accordance with World Athletics requirements

REKORTAN PUR / PUR INDOOR

AREAS OF USE

- Competitive running tracks
- Athletics stadiums and halls
